

**SINGLE TURN
ABSOLUTE
ENCODER
0Q80EXS**

Explosion-proof encoder, certified by ISSEP, ATEX Ex d II C T6, according to CENELEC Standards. 'Size 25' square flange. Fitted to be used on working environments with explosive atmosphere (except for grisù').
Absolute single turn encoder from 7 to 12 bits.

**ATEX
(DIRECTIVE 94/9/CE)**

CE Ex II 2 G D

Sized draw standard version:

CV2 R

Measures without tolerance according to UNI ISO 2768-mk

**GAS "G"
and
DUST "D"**

**CE Ex II 2 G Ex d IIC T6 Gb
D Ex tb IIIC T85°C Db IP6X**

Ex Encoder built with certification ATEX explosion-proof rules, according to armonized standards EN60079-0/EN60079-1/EN60079-31. Certified by ISSEP ISSEP07ATEX018X and notified by CESI CESI02ATEX138Q. Special conditions for safe use: symbol X.
The apparatus is fitted with a cable suitable with temperature of 100°C minimum permanently connected to it; an appropriate connection of the free end of the cable shall be foreseen. The quality of the assembly screws shall be 8.8 at least.

Ex : Manufactured in accordance with one or more Cenelec security Standards.
d/tb : It means explosion-proof case.
Db/Gb: Protection level.
IIIC : Conductive dust.
II : Built for use in all sites except for mines with grisù'.

C : Maximum security (MESG) experimental gap type.
IP6X: Degree of protection (IP code).
T6 : Maximum temperature of the case surface: 85°C (standard).

ELECTRONIC OUTPUT	INTERFACE	PARALLEL OPTIONS
» (1) NPN open coll.10mA(std) 	» (GP) (EP) Parallel The angular value is present on the output connector in a 'parallel' form. The number of conductors is proportional to the resolution and the type of selected code. Any electronic output stage can be applied.	»
» (2) NPN open coll.10mA + PTC 	» (GS) (ES) Serial SSI The data output (available only with Gray or Excess code) is controlled by an external clock. The angular position's value is first stored into the encoder and then transmitted outside starting from the MSB. The standard of transmission is RS422. The transmission sequence is 13 bits long. The clock frequency is 125 kHz.	»
» (3) NPN open emitt.10mA+ PTC 	» (A) Analogic 'current' » (V) Analogic 'voltage'	»
» (4) Push-p. 10mA+PTC 	Encoder's angular position with 12 bits resolution (4096 div./rev) is converted in an analog (mA or V) quantity proportional to its value. In the standard version (360° of rotation) Iu=1+20mA Vu=0+10V.	»

- (1) For parallel version (GP), (EP)
 (2) Only power supply 15V or 18+28V and resol.4096
 (3) Only outside potentially explosive environments
 (4) The junction has to be made with Ex junction box or outside potentially explosive environments

Product manufactured according to UNI EN ISO 9001:2008, supplied with CHECKING and CONFORMITY declaration with CE mark and with TWO (2) YEARS WARRANTY starting from delivery date.

ELCIS encoder company has the right to make any changing without previous notice.
